

CAKE STACKER

Smart Conveyor for Stacking Cake Layers

Handling cake layers can often lead to breakage and product waste. The Cake Stacker helps solve these problems and keeps production staff concentrating on more value added tasks.

Benefits:

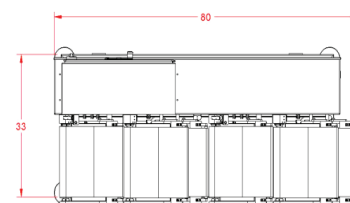

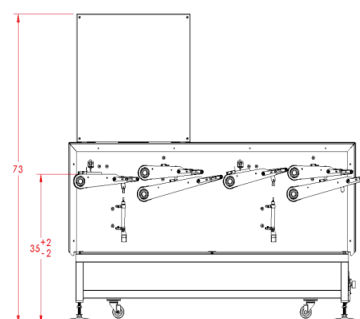

- Assemble round and sheet cakes.
- Reduces waste and breakage — assembles cakes more accurately, consistently and efficiently.
- Increases throughput.
- Reduces repetitive stress injuries.

Features & Specs

- Electronic control system with graphic interface.
- 20 recipe storage capacity.
- Small footprint and easy to move.
- Servo driven retracting, and outfeed conveyor.
- Stacks up to 60 layers per minute.
- Compatible with half-sheet cakes (18" x 13") and round cakes (13" diameter).
- Modular customization allows the system to stack up to 6 cake layers.

Cake Stacker for round cakes

POWER REQUIREMENTS

230 V. 3 Phase. 4 Wire. 20A.
Pneumatic 6-8 CFM @ 100 PSI
