

BAKER-BOT MAX

Industrial, User-Friendly Cobot

The Baker-Bot MAX is an industrial cobot that can handle applications just outside the threshold of our other Baker-Bot models. With double the payload of the Baker-Bot 10 and greater reach, this cobot still remains safe and user-friendly.

Benefits:

- Versatile for repetitive and multi-tasking.
- Helps with labor shortages.
- Reduces worker repetitive strain injuries.
- Well-suited for demanding industrial tasks.
- Minimal guarding required.
- Never gets sick or needs a break.
- Does all the dull, dirty and dangerous tasks.

Features:

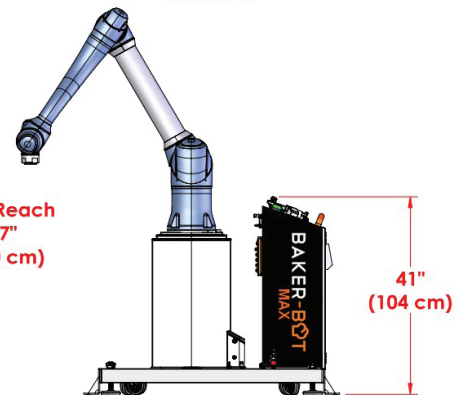

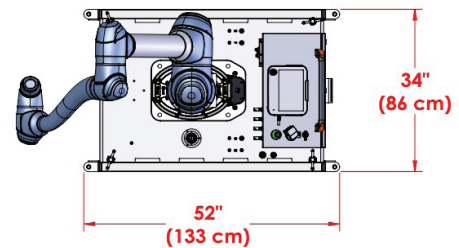

- Increased payload of 44lbs.
- Increased reach of 67".
- Pallet height capacity of 89".
- Small industrial footprint — generally fits into your existing production space.
- App based interface — if you can use a smart phone or tablet, you can use the Baker-Bot MAX.
- Quick tool changeover.

Suggested Applications:

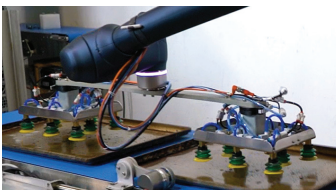

- Tray handling and palletizing.
