

TRAY FEEDER

Stop Manual Tray Feeding

Manually loading trays (sheet pans) onto a conveyor, depositor or cookie machine is time consuming and can cause physical strain and injury.

The Tray Feeder automatically loads trays with or without parchment paper onto your production equipment.

Benefits

- Reduces repetitive strain injury and helps with labor shortages
- Easily integrates with your existing production equipment
- Feed trays wide edge leading or short edge leading

Features

- Robust, sanitary stainless steel design
- Automatic tray lift from dolly to the feed platform.
- Optional automatic parchment paper attachment
- Graphical operator touch screen
- Stainless steel dolly available for easy roll in and out of trays into holding area

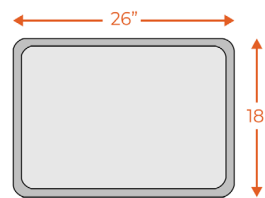

Specifications

- Tray cart capacity: 80 trays
- Feed up to 20 trays per minute (15 trays per minute with parchment paper)

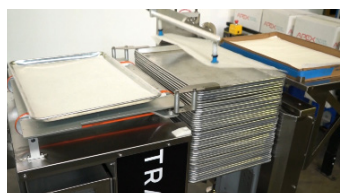

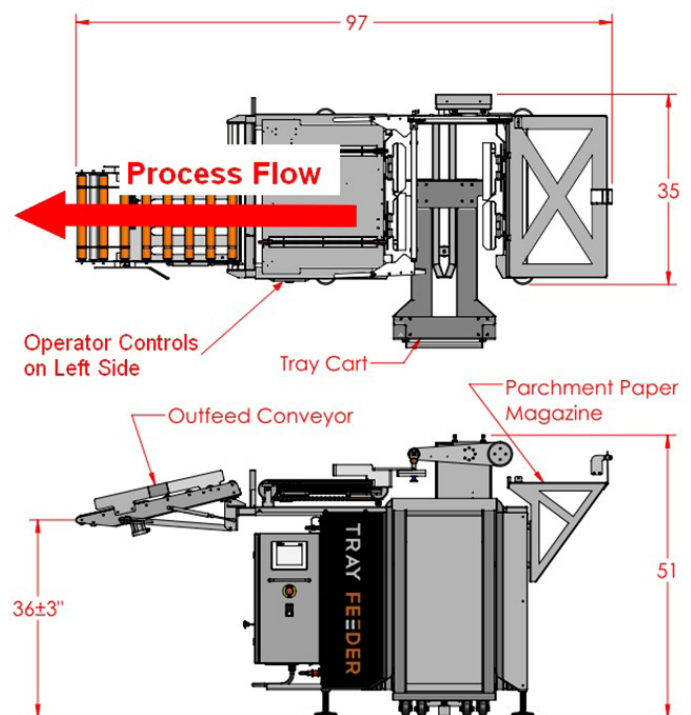

POWER REQUIREMENTS

Electrical: 220 VAC single phase 15A

Pneumatic: 4 cfm @ 80 psig

Compatible tray (standard North American sheet pan)
